

Here is a series of still shots you can use to create a slideshow type video to promote the Affiliate Marketing War Machine.

Hi, this is Mike and I hope this file may prove useful to you.

If you use video postings on YouTube and other sites to drive traffic to your pre-sell pages, I have created some static images here to promote my product.

You can take a screen shot of any images you would like to use (you may need to resize them a little) and assemble them into a slideshow type video using whatever video production software you have. I have the dimensions set at a 4 x 3 ratio which works well on YouTube.

Under each shot text you could use as a voice is given over if you wish to use it. Of course you can create your own if you wish.

Try to keep the video short--hopefully under 1.5 minutes. Don't give too much info--your goal is to make viewers curious.

At the end create a frame with a link to your pre-sell page for the product, or use one of my ending frames and insert an annotation in YouTube or use the frame directing them to click on the link under your Avatar if you have it set up that way.

If you wish to use a video I have created using these images you are welcome to download it here:

You can use my video and then simply create a new video by inserting my video file into your video production software. and then adding just one frame at the end with a link to your pre-sell page on it.
